ABOUT ME

I am a Senior Software Engineering student with experience in UML diagrams, OOP and SOLID principles, Artificial Intelligence, Image Processing, Database Management, and basic Web Applications. During my internships, I contributed to an iOS project integrating AI features and a real-time iOS messaging application by developing features with UIKit and SwiftUI, working on voice and video calling features using CallKit, JitsiMeetSDK, AVFoundation, and AVKit. I aim to enhance my technical skills by exploring new technologies and applying them in real-world projects.

WORK EXPERIENCE

- | | |
|--|---|
| Native iOS Engineer Intern, Orion Innovation Turkey | 2025 – 2026
Istanbul |
| <ul style="list-style-type: none">• Develop iOS features using Swift and SwiftUI in a real-time messaging app• Support app distribution using TestFlight, App Store Connect and Apple Developer Portal• Integrate Firebase Cloud Messaging, Firestore / Realtime Database and Cloud Functions• Implement push notification workflows with UserNotifications and PushKit• Build voice and video calling features using CallKit, JitsiMeetSDK, AVFoundation and AVKit• Contribute to debugging, testing and deployment of production iOS apps | |
| Native iOS Engineer, QuantumCode Software Technology | 2025
Remote, Samsun |
| <ul style="list-style-type: none">• Develop iOS apps using Swift, SwiftUI, and MVVM architecture• Integrate AI-based message suggestions and dynamic voice playback• Build interactive UIs with Core Animation and Lottie animations• Implement gesture-driven navigation and custom UICollectionView flows• Utilize Firebase, REST APIs, and Core Data for real-time data sync and persistence• Focus on clean architecture, performance optimization and modular design | |
| Frontend Developer (Freelancer), Outlier | 2025 – Present
Remote, San Francisco |
| <ul style="list-style-type: none">• Develop modern web frontends using Next.js and TypeScript for AI-focused platforms.• Collaborate as an AI Trainer to enhance frontend implementations of AI tools through structured interface improvements and code optimization. | |
| Native iOS Developer Intern, Flo Magazacilik ve Pazarlama A.S. | 2024
Istanbul |
| <ul style="list-style-type: none">• Participated in the development of native iOS applications using Swift and Xcode.• Contributed to UI/UX improvements and tested app features across multiple devices. | |

EDUCATION

Software Engineering, Bachelor's Degree, Karadeniz Technical University
GPA: 3.27 / 4.00

SKILLS & INTERESTS

Technologies SwiftUI, UIKit, Python, Java, TypeScript, Vue.js, Nuxt 3, UnoCSS, SQL Server, Firebase, Supabase, MongoDB, Git, Xcode, Microsoft Azure, Google Cloud	Abilities Native iOS Development, Web Development, Face Detection, Image Processing, UI/UX Design, Machine Learning, Cloud Computing

PROJECTS

Convergo Messaging , <i>Swift, SwiftUI, Firebase, Kingfisher, JitsiMeetSDK, AlertKit, Giphy iOS SDK, UserNotifications, PushKit, CallKit, AVFoundation, AVKit, PhotosUI, Contacts, MessageUI, SwiftData, Combine, UIVisualEffectView</i> • Built a native iOS real-time messaging application inspired by WhatsApp and Telegram, supporting chat, media sharing and modern communication features • Integrated Firebase Firestore, Cloud Messaging and Cloud Functions for real-time data synchronization and push notification workflows • Implemented voice and video calling capabilities using JitsiMeetSDK, CallKit, PushKit, AVFoundation and AVKit • Implemented rich messaging features using Giphy iOS SDK, PhotosUI, Kingfisher, Contacts, MessageUI, UIVisualEffectView and AlertKit	2025 – 2026
Whispi , <i>Swift, UIKit, Firebase, Kingfisher, VisualEffectView, SkeletonView, SnapKit, UserNotifications, CoreHaptics, StoreKit, MessageUI, Network, Security, Lottie</i> • Built a native iOS AI girlfriend app that creates personalized romantic chat experiences with audio/video messaging capabilities using AVFoundation and CoreHaptics for immersive interactions. • Integrated StoreKit for in-app purchases, UserNotifications for push alerts, and proximity sensor technology for enhanced user engagement. • Developed with MVVM architecture using SnapKit for responsive UI, Kingfisher for profile image caching, and SkeletonView for enhanced loading states.	2025
TasteAI , <i>Swift, Firebase, CoreData, Gemini API</i> • Developed a native iOS app that generates AI-powered personalized recipes using Gemini API, integrating Firebase for authentication and data storage, and Core Data for offline recipe persistence	2025
Image Processing Toolkit , <i>Python, OpenCV</i> • Developed a modular image processing application featuring histogram analysis, thresholding, morphological operations, skeletonization, and centroid detection using OpenCV and custom algorithms.	2025
Emotion Analysis with Azure , <i>Python, Microsoft Azure</i> • Built a sentiment analysis application using Azure Cognitive Services to detect emotional tone from user input. • Integrated cloud-based APIs for real-time analysis and visualized results through a web interface.	2025
